

ENVIRONMENT PROTECTION POLICY

The Management Board of „Remontowa” S.A. declares, that minimization of the Shipyard manufacturing activity effect on the natural environment makes one of the key elements of the strategy, its functioning and development.

In order to reduce the effect on the natural environment, we apply methods of works and technical means which serve preventing of pollutions.

We use energy and raw materials in a reasonable way, in accordance with the principle of sustainable development.

Environmental aspects of the Shipyard activities have been identified and assessed. Manufacturing activity and technical operations connected with the important environment aspects are carried out in specified conditions and are subjected to monitoring.

In the „Remontowa” S.A. activities in the interest of the environment protection we hereby declare:

- marinating the conformance with legal requirements concerning the environment,
- reducing the nuisance for the environment by choosing and applying technologies friendly for it,
- raising the ecological awareness of the Shipyard employees,
- continuous improvement of technological and organizational methods and environmental management system, serving reduction of the company effect on the environment and improvement of environmental effects of the activity,
- continuous improvement of the Integrated Management System in accordance with PN-EN 14001:2015, PN-EN-ISO 9001:2015, ISO 45001:2018 and AQAP 2110:2016.

In order to accomplish the best environmental effects we intend to:

- develop the manufacturing activity taking into consideration technologies preventing of pollutions,
- effectively use energy resources,
- economically and effectively manage the resources of raw materials,
- minimize the quantity of produced waste materials, carry out recovery and segregation of them,
- apply and develop techniques and technologies preventing emissions of pollutants,
- take into consideration the needs connected with environment protection at the stage of planning and realization of the manufacturing and investments,
- carry out activities aiming at increasing the level of knowledge and awareness of the Shipyard employees and its co-operators in the scope of environment protection.

Environmental targets and intensions are specified and they are known to employees supervising manufacturing, investment processes as well as environment protection.

All the employees are engaged in the activities aiming at reduction of effect of the Shipyard manufacturing processes on the environment.
